

Annex 1 – Overview of technical activities

The cooperation between the National Agency for Meteorology and Environmental Monitoring (NAMEM) and Météo-France International (MFI) within the framework of the Fonds Équipe France project will focus on strengthening meteorological services in Mongolia.

The planned activities include in particular:

1. Deployment of forecasting and production tools

Provision and configuration of meteorological forecasting and production solutions for NAMEM, including systems enabling improved visualization of meteorological data, forecast preparation and dissemination of meteorological products.

2. Installation of supporting infrastructure

Supply and installation of the necessary technical equipment required for the operation of the systems, including servers, data storage and associated infrastructure.

3. Capacity building

Training activities for NAMEM staff on the operation, administration and use of the systems, including on-site training sessions and technical workshops.

4. Technical assistance and support

Technical assistance provided by MFI during the deployment phase and limited post-installation support to ensure the proper use of the systems.

5. Development of meteorological services

The detailed implementation of these activities will be defined through technical arrangements agreed between MFI and NAMEM.

Annex 2 – Communication and visibility principles

1. Acknowledgement of the project support

Communication materials related to the activities should acknowledge the support of the Embassy of France through a Fonds Équipe France programme.

The following wording may be used for this purpose:

This project is supported by the Embassy of France through the Fonds Équipe France programme.

2. Use of visual identity

Communication materials related to the activities should include the Embassy of France visual identity (logo) in accordance with the communication guidance shared by the Embassy of France in Mongolia.

3. Communication by the Parties

Each Party may communicate about the activities carried out under this cooperation through its institutional communication channels, including websites, press releases and social media. Prior coordination between the Parties' communication departments should be prioritized.

4. Promotion through social media

The Parties encourage regular communication on social media in order to highlight the progress and results of the cooperation.

Where appropriate, the Parties may also share or repost each other's publications in order to increase the visibility of the initiative and strengthen the impact of the communication.

5. Informal coordination

The Parties will maintain regular and informal exchanges on communication activities related to the cooperation in order to ensure consistency of messaging and visibility of the partnership.
